-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Kosofsky et al. (U.S. Patent Number 5,935,341).

Kosofsky et al. disclose a method and apparatus for closed-loop pressure washing.

Referring to Figs. 7 and 8, the apparatus comprises air pressure source 200 feeding the system, preferably at about 40 to 100 psi from air compressor, compressed-gas bottle, or the equivalent. One branch of the coupling feeds an external dryer wand. The wand may be used to blow-dry the washed object. Under the principals of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. When the prior art device is the same as a device described in the specification for carrying out the claimed method, it can be assumed the device will inherently perform the claimed process. *Ir re King*, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3744

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kosofsky et al. (U.S. Patent Number 5,935,341) in view of Kojima (U.S. Patent Number 4,892,569).

Kosofsky et al. disclose a method and apparatus for closed-loop pressure washing. Referring to Figs. 7 and 8, the apparatus comprises air pressure source 200 feeding the system, preferably at about 40 to 100 psi from air compressor, compressed-gas bottle, or the equivalent. One branch of the coupling feeds an external dryer wand. The wand may be used to blow-dry the washed object. Kosofsky et al. disclose the invention substantially as claimed. Kojima discloses compressor connected to the storage tank in the same field of endeavor for the purpose of providing compressed air. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the apparatus of Kosofsky et al. with a compressor-tank combination in view of Kojima so as to continuous supply air.

Allowable Subject Matter

5. Claims 1-10 and 15 are allowed.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.
